Have gone into the making of
Diamond Rubber Belts, Hose, Packing

And all the experience gained in
those days of work, study, experi-
ment and research is at the service
of American Industry TODAY!

It follows that Diamond Rubber
Belts, Hose and Packing are unsur-
passed in quality, in reliability, and
in economy.

Further, our Branch and Distributor
service assures prompt deliveries to
every part of the United States.

OUR CATALOG

is a mine of useful infor-
mation for the practical
engineer. Copy sent upon
request.

Eight 500 Bushel Morris Grain Driers

Morris *Dust Collecting* Automatic Grain Drier

Uses fresh air in both drier and cooler.
Automatically regulates the flow of grain.
Every kernel gets the same uniform treatment.
Strength of air current adjustable to provide maximum amount for any grain, light or heavy.
Removes and collects dust from drier building.
Prevents the danger of dust explosions and fire.
Only fresh air enters the drier house, ending the dust nuisance.

*Before you install any drier
investigate the Morris*

Directory of the Grain Trade

In Organized Markets Only Members of the Local Grain Exchange Will Be Listed

HAVING YOUR name in this directory will introduce you to many old and new firms during the year, whom you do not know or could not meet in any other way. Many new concerns are looking for connections, seeking an outlet or an inlet, possibly in your territory. It is certain that they turn to this recognized Directory, and act upon the suggestions it gives them.

New York Produce Exchange

Grain Futures Market

Buffalo Delivery

Domestic Wheat Contract—Bonded Wheat Contract

The domestic contract is for the desirable milling grades of United States wheat and the bonded contract is for the standard export grades of Canadian wheat in bond.

The deliveries are at Buffalo, the eastern terminus of the Great Lakes navigation. The movement of wheat through Buffalo each year varies from 125,000,000 bu. to 175,000,000 bu. More than half of the Canadian export movement moves through Buffalo.

At Buffalo the grain is available for distribution within a comparatively few hours for export via any Atlantic port from Montreal to Newport News.

Grain is stored in Buffalo elevators, licensed by the Board of Managers of the New York Produce Exchange, under bond satisfactory to the Exchange. All grain is under the supervision of the New York Produce Exchange Grain Inspection Department. The American grain is inspected under the United States standards and the Canadian grain is delivered on the original Dominion inspection.

Contracts are for 5,000 bu. with smaller amounts traded in. Indemnities are provided for both contracts.

Commissions for non-members are $\frac{1}{4}$ c per bushel for 5,000 bu. lots.

A strongly organized Clearing House has been formed to clear all contracts. This association has a guaranty fund to protect contracts in addition to original and market margins.

Members of the Clearing House are as follows:

Andrus, C. W. & Son
Bache, J. S. & Co.
Barnes-Ames Company
Betts & Power
Canada Atlantic Grain Export
Co., Inc.
Clark, John F. & Co.

PEORIA

Because of a large and constant local industrial demand for manufacture into starch, alcohol and feed and because Peoria is a most important distributing point for grain to the South, Southeast and East, the members of its Board of Trade are in position to give shippers of grain good prices at all times. The profit side of your ledger will be more attractive after a short time of dealing with these Peoria Board of Trade Members.

ST. LOUIS

Surrounded by the great grain producing areas of the Mississippi Valley desires to serve you—

Located where 26 lines of railroads converge, it has unexcelled transportation from the grain producing areas of Missouri, Illinois, Kansas, Iowa, Oklahoma, Nebraska, South Dakota, Colorado and States further west—

The terminus of eastern trunk lines, and having direct through lines to the gulf including a modern government operated barge line to New Orleans, at a differential of 4 cents per bushel on wheat and 3.64 cents on corn under the rail rate, St. Louis is regarded by foreign buyers as a logical starting point for foreign grain shipments. The lower freight rate by water enhances the price at St. Louis which inures to the benefit of the country shipper—

The enormous flour and feed milling industries of the city, enjoying many in-transit privileges and selling their product for export and to the cotton producing South, also take a large percentage of St. Louis grain receipts—

Give any of these members of the St. Louis Merchants Exchange listed here an opportunity to prove to you the advantages of this market—

MILWAUKEE

WHY

the Milwaukee grain market retains its supremacy and the Chamber of Commerce sustains a leading position in the face of keen competition can be told briefly:

Milwaukee at all times has a big, broad market for all Grains.

Its shipping facilities are among the best on the Great Lakes and its harbor is one of the most secure and ample.

Its industrial consumption provides an active demand all the year.

It offers a premium over other markets in competitive territory for consignments, because it has a big shipping demand and very large elevator capacity.

Its remittances on consignments are extremely prompt.

Millers, Exporters and Country Shippers are invited to investigate the advantages to be derived by dealing with any of these Milwaukee Chamber of Commerce Members.

Clark's Double Indexed Car Register

for car lot dealers

Is a record book designed to afford ready reference to the record of any car number. Facing pages 11x15½" of heavy ledger paper are each ruled into five columns, those on the left-hand page being numbered 0, 1, 2, 3 and 4; while columns on the right-hand page are numbered 5, 6, 7, 8 and 9. Each column is ruled into three distinct divisions with the following sub-headings: "Initial," "Car No." and "Record."

The marginal index figure represents the right hand or unit figure of the number entered; and the column heading the second or tens figure. So that the required number can always be instantly found if properly entered.

Form 40 contains 42 pages, bound in heavy canvas covers with spaces for registering 13,200 cars. Price, \$2.50. Weight 1¾ lbs.

FORM 42 contains 72 pages, bound in art canvas covers with spaces for registering 21,600 cars. Price, \$3.25. Weight 2¾ lbs.

AN UPHILL JOB

A tool that pays a dividend is always a good investment, no matter what the cost. To call a switch engine and crew every time a car is to be moved is expensive and means loss of time and production. To move heavily loaded cars by hand is not, in every case, an easy job and track conditions on plant sidings often make it worse. Unless the tool best adapted for this work is used it becomes a decidedly uphill, back-breaking job. Put one of the new improved type ATLAS

MADE EASY

Car Movers under the wheel and the uphill job flattens out and becomes almost as easy as a down grade. Why? Because the tool is specially made for the job, with power enough to move any car; so designed as to give an equal distribution of strain on all parts, preventing wear at any one point, assuring perfect service and long life. The cost of the ATLAS is so small that after being used once or twice it pays a dividend equal to a switching charge every time it is used.

No Need to

Strain the Back

OUR POLICY

The "ZELENY" Protects Your Grain

It is a simple device for testing the condition of grain stored in bins or tanks, by giving at all times the accurate temperature of the grain, not merely at the bottom and the top of the bins, but at intervals of five feet up through the bins. It saves you money by eliminating unnecessary turning of grain, which entails shrinkage, time, labor, power and wear on machinery; prevents bin-burned grain; increases working capacity of plants by saving time.

Further data will be furnished on request.

Railroad Claim Books

Our Improved Railroad Claim Books are designed especially to expedite the collection of grain, seeds and feed claims. They facilitate the filing, and contain spaces for all the necessary information in the order which assures the prompt attention of the claim agent. They increase and hasten your returns by helping you to prove your claims and by helping the claim agent to justify payment.

Form A is for Loss of Weight in Transit Claims.

" B—Loss in Market Value Due to Delay in Transit

" C—Loss in Quality Due to Delay in Transit.

" D—Loss in Market Value Due to Delay in Furnishing Cars.

" E—Overcharge in Freight or Weight.

These claim blanks are printed on bond paper, bound in book form, each book containing 100 originals and 100 duplicates, a two-page index, instructions and summary showing just which claims have not been paid, and four sheets of carbon. You tear out the original to send to the claim agent, and the carbon copy remains in the book, as a record of your claim.

The five forms are well bound in three books, as follows:

411-A contains 100 sets all Form A. Price, \$2.00

411-E contains 100 sets all Form E. Price, \$2.00

411-5 contains 60 sets Form A, 10 Form B, 10 Form C, 10 Form D and 10 Form E. Price, \$2.00.

Now F-M dependability in larger Diesel units

This engine is the outgrowth of proved principles in Diesel building. To plants with large power requirements it offers a Diesel of unprecedented simplicity—Fairbanks-Morse simplicity. And with this simplicity goes the dependability that has been indelibly written into the operating records of more than a million horsepower of Fairbanks-Morse installations.

Like other F-M Diesels this larger engine is a valveless two-stroke-cycle Diesel with port scavenging, airless fuel injection,

and trunk-type pistons. Thus it retains the basic principles that have made Fairbanks-Morse a great name in the Diesel industry.

The illustration shows how thoroughly these basic F-M principles have been adapted to the requirements of larger Diesels. Here is compactness coupled with accessibility—simplicity coupled with staunchness.

And one result—the result you would expect in any F-M Diesel—*absolute dependability*.

The larger series of F-M Diesel Engines
are built in sizes of 480 - 600 - 720 hp.

FAIRBANKS-MORSE

DIESEL ENGINES · PUMPS · MOTORS

Battery of Fairbanks Hopper Scales installed in elevator of Montreal Harbor Commission.

A truly fine Hopper Scale —the Fairbanks Type “S”

The Fairbanks Type “S” Elevator Hopper Scale is built on thoroughly sound scale principles developed through nearly a century of scale-building experience. All levers of this scale are loaded on true center lines, eliminating torsion in the lever and the attendant error. The construction provides for transferring the load from the hopper to the scale levers through a combination of suspension elements that allows for the disturbance of emptying the hopper without changing the accurate initial balance of the scale.

All knife edges and bearings are in full view, making inspection rapid and easy. The most modern hopper scale refinements are embodied in the Type “S,” including improved type

of registering beam with notches exposed downward to prevent lodgment of dirt and to insure accurate placing of poise; positive weight lifting device that greatly speeds up weighing—and other advanced features. The scale fully

conforms to the specifications of I. C. C. Docket 9009. Built in capacities of 2,000 and 2,500 bushels.

Plays safe with this motor

Electrical elements are completely enclosed. Carefully planned ventilation efficiently cools the motor. F-M ball-bearing construction means grease only once a year.

The Fairbanks line of scales for the grain and flour industry includes hopper scales for practically every requirement: scales for testing grain and seed; scales for sacking flour; wagon and auto-truck scales; and others. The knowledge and experience of Fairbanks Scale experts is always yours for solving your weighing problems—without obligation.
